

Research Methods

Day 13 · Session 13: Full Rehearsal & Peer Feedback

Outline for Today

1. **Full Dress Rehearsal — Round 1**
2. **Feedback Integration Time**
3. **Scientific Storytelling: Q&A Practice**

Session 13: Full Rehearsal & Peer Feedback

Learning Objectives

Complete a full dress rehearsal with timed delivery

Present start to finish, on the clock — just like the Summit.

Give and receive structured, specific, constructive feedback

Trade feedback that names *what* and *where*, not just "good job."

Identify and implement one concrete improvement

Turn the feedback into a real change before you leave the room.

Build confidence and reduce presentation anxiety

The cure for nerves is reps. Today is a full rep in a safe room.

Morning: ResearchCORE

Full Dress Rehearsal – Round 1

Full Dress Rehearsal – Round 1 (90 min)

Each team presents to a **small group of 2–3 other teams + one instructor.**

Timed strictly: 10–12 min presentation + 3 min Q&A.

Audience uses the **Presentation Feedback Checklist.**

After each talk: **2 minutes** of structured feedback.

This is a full rep

No stopping, no restarts. If something breaks, keep going — that's exactly the skill the Summit demands.

12:00

The Presentation Feedback Checklist

As you watch, score each area:

- **Story** — clear question → findings → takeaway?
- **Slides** — one idea each, readable, captioned?
- **Delivery** — pace, eye contact, smooth hand-offs?
- **Evidence** — claims backed by the data shown?
- **Timing** — within 10–12 minutes?

Take notes *during*, not after

Jot the exact slide or moment. "Slide 6's chart had no title" beats "the middle felt unclear" — specifics are what the team can act on.

How to Give Feedback That Helps

Use the two-part frame — one genuine strength, one specific fix:

 **"One thing that was really strong was..."**

Name the specific moment so the team knows to keep it.

 **"One thing that could be clearer is..."**

Point to one concrete, fixable thing — not a vague feeling.

How to Give Feedback That Helps

Use the two-part frame — one genuine strength, one specific fix:

 **"One thing that was really strong was..."**

Name the specific moment so the team knows to keep it.

 **"One thing that could be clearer is..."**

Point to one concrete, fixable thing — not a vague feeling.

 **Feedback is a gift, kindly given.** Critique the slide, never the person — and always leave the team with something to *do*.

Feedback Integration Time

Feedback Integration Time (30 min)

Turn Round 1 feedback into real changes:

1 **Review** all the feedback your team received.

2 Pick the **top 3 specific improvements** — highest impact first.

3 **Divide responsibility:** who makes which change?

4 **Implement** before the timer runs out.

🔹 **You can't fix everything — pick 3**

A room full of notes is overwhelming. Three concrete fixes, actually done, beat thirty ideas left undone.

30:00

Scientific Storytelling: Q&A Practice

The 5 Questions Audiences Always Ask

1 **"Why did you choose this topic?"** — have your origin story ready.

2 **"How do you know this relationship is real, not coincidence?"** — point to your evidence and caveats.

3 **"What would you do differently with more time?"** — name your top limitation and next step.

4 **"Who could use these findings?"** — connect to a real audience.

5 **"What surprised you most?"** — share the moment the data changed your mind.

 **Brainstorm your answers in advance** and decide *who* on the team fields each type of question.

20:00

Fielding a Question Gracefully

Listen fully — let them finish before you answer.

Restate the question so everyone hears it.

Answer briefly, then stop — don't ramble.

When you don't know

"That's a great question. Our study didn't address that directly, but based on what we found..."

An honest answer beats a made-up one, every time.

Session 13: What You Can Do Now

Rehearsal & delivery:

- Deliver your **entire presentation** within a strict 10–12 minute window and hold a 3-minute Q&A without losing your footing.

Feedback, both directions:

- Give feedback with the two-part frame — one specific strength, one concrete fix — and receive it without defensiveness.
- Turn a room of notes into your **top 3 improvements**, assign them, and implement them on a timer.

Q&A confidence:

- Prepare answers to the five questions every audience asks, and field an unexpected question honestly with the *"great question... based on what we found"* bridge.
