

DataCORE

Portfolio Final Check, Data Art & Final Words

July 16, 2026

Afternoon: DataCORE

1. **DataCORE Portfolio Final Check (1:00–1:45)**
2. **Data Art + Celebration Visualization (1:45–2:45)**
3. **Scientific Storytelling — Final Words (2:45–3:00)**

Lock the portfolio you'll display at the Summit, make one chart that's purely beautiful, and say out loud how far you've come.

1:00 – 1:45 · DataCORE

Six items, checked one last time

Analysis notebook

Clean, commented, readable by someone who did *not* write it.

Exported figures

300 DPI, descriptive file names.

Summary table

Statistics table with a proper caption.

Data cleaning log

What you changed, and why.

AI usage log

Tools, prompts, and errors the AI made.

Notebook PDF

The exported document you display at the Summit.

 **This portfolio is a real artifact.** Future versions of Nexellence INQUIRE may cite it as an example — treat it like a first publication.

The "someone else" test

Hand your notebook to a person who has never seen it. Can they, **without you in the room**:

Run it top to bottom with no errors?

Follow it from the header cell to the limitations cell?

Rebuild your main figure from your code?

✓ If the answer to all three is **yes**, your work is reproducible — the highest compliment a portfolio can earn.

45:00

1:45 – 2:45 · Data Art

Make one chart that's beautiful *and* true

Create one "**data art**" visualization from your team's data — beautiful and informative at once. **No rules on format:**

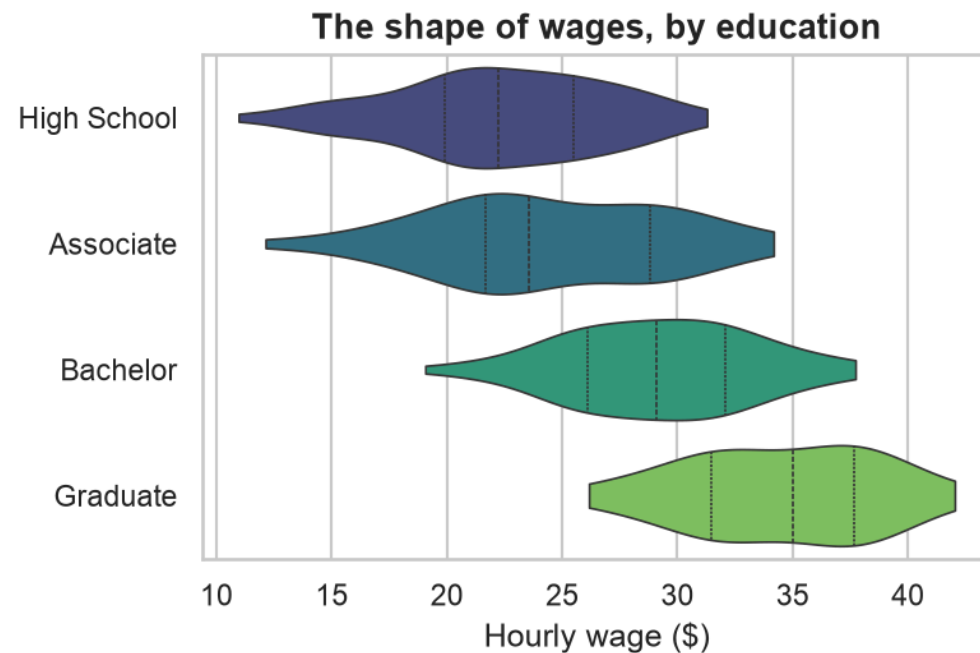

Word cloud of key variables

Animated plot

An unusual type: ridgeline, waffle, network graph

One example — a violin "ridgeline" in viridis.

Share & celebrate

An informal **show-and-tell**:

Put your data art on the screen.

Say one sentence about what makes it *you*.

Applaud every team.

Three weeks, one artifact

You turned a question into data, data into findings, and findings into a story. That's the whole of research — take a moment to see it.

60:00

2:45 – 3:00 · Scientific Storytelling

“ One sentence each

Every team member writes and shares a single sentence:

"Three weeks ago I didn't know how to __.

Now I can __."

Say it out loud to the group. This is the **closing statement of your research apprenticeship.**

...and the **opening statement** of whatever comes next.

15:00
